

# Valparaiso University STEM Faire

Saturday, April 8, 2017 - 9 am - 3 pm

## What is the Valparaiso University (V.U.) STEM Faire?

The V.U. STEM Faire is a joint venture between SWE (Society of Women Engineers), Valpo Robotics, and the V.U. College of Engineering. This event aims to bring together Northwestern Indiana's thinkers and innovators for a day of discovery and sharing – and culminates with the Robotics Football Championship Game!

## How can students and their families participate?

K-12 students and their families can participate in two different ways...

- **First** – you can just show up! The STEM Faire is completely free! Come and see all the exciting STEM projects and activities at the faire, watch some robotic football, and have a good time!
- **Second** – you can **BE** a part of the event! Register and showcase your STEM/STEAM project in our project show and tell space! Please note: students K-5 must be accompanied by an adult.

## What might a project involve?

STEM/STEAM (Science, Technology, Engineering, Art and Math) can include anything from coding, arts, crafts, engineering, science, music, food, health, technology, and more... The possibilities are endless!

**Mark your calendar to attend the VU STEM Faire on April 8**

To enter your project register at : [bit.do/stem-faire](http://bit.do/stem-faire) - ( K-12 Student Parent ) by March 15<sup>th</sup>
